Fires Collection

The widest range of electric fires imaginable

2016/17

dimplex.co.uk/fires

Dimplex®

Light your fire

There is nothing quite like a fire – it creates a wonderful feeling of comfort and cosiness. And with a Dimplex electric fire you can enjoy these benefits at the flick of a switch. Installation is also easy with none of the cost and siting constraints associated with flue and gas connections and no need for annual servicing either. All Dimplex electric fires come complete with a fitted plug and many don't even require a fireplace. You simply plug-in and go!*

At Dimplex safety is always a priority too, so all our electric fires have the added reassurance of BEAB approval** which means they have been produced to the most stringent safety requirements for domestic electrical appliances.

With a wide range of traditional and ultra modern designs, we can offer a fire for every living area and every budget.

You can also choose from three stunning flame effects – Optiflame®, Opti-myst® and Opti-V®. Please see individual product pages for details of the flame effect fitted to each fire.

* wall mounted and Opti-V fires require installation. Opti-myst range requires water to be added
** approved or awaiting approval at time of printing

PART OF OUR
Display & Demonstrate
COLLECTION

The Display and Demonstrate range is only available for viewing, demonstration of features and purchase from retailers with showroom premises. For details of where to view and purchase these products, please visit our website, www.dimplex.co.uk/fires and click on the "Where to Buy" section of the individual product pages.

Deceptively Real

Looking deceptively real, Opti-myst® will captivate you from the moment you see it. The fully 3-dimensional effect uses established ultrasonic technology to create an ultra-fine water mist. As the mist rises up through the logs or coals, the light reflects against the water creating a convincing illusion of flames and smoke. The result is an appearance so authentic it will be mistaken for true flames and smoke.

Opti-myst® –
An effect that surpasses all expectations for realism in an electric fire.

See it and believe it!

See a video of the flame effect for yourself at **www.dimplex.co.uk/optimyst**

The world's most popular electric flame effect

Optiflame® is our original and the world's best-selling electric flame effect. So many people around the world appreciate the benefits of using a Dimplex Optiflame® electric fire.

Optiflame® creates the illusion of flames emanating from the centre of a fuel bed to provide a realistic glow that can be enjoyed throughout the whole year.

All Dimplex Optiflame® fires are 100% efficient at point of use, so no heat is wasted.

The 'flames' can also be used independently of the heating, so you can enjoy the cosiness of the flames on those dark but mild spring and autumn evenings.

All fires also come complete with a fitted plug and many don't even require a fireplace! However if your preference is for a complete fireplace, Dimplex can offer this too with a choice of suites and ready-to-fit surrounds.

See a video of the flame effect for yourself at **www.dimplex.co.uk/optiflame**

Opti-V

PGF10

PGF20

PGF10 & PGF20

The most unbelievable electric flame effect yet

Opti-V® utilises the latest High Definition TV technology to create flames and sparks for a virtual fireplace experience like no other. The unique and patent protected design combines realistic flickering flames with three dimensional LED logs that sporadically spark! With the addition of an audio element of crackling logs, the illusion of a real fire is complete.

A great centrepiece of any lounge

- Fully built-in electric wall fire with Opti-V® flame effect
- Flame effect is shown via 22 inch, full colour, High Definition LCD television screens
- The screen fuel bed and lighting is run by low energy LEDs
- Remote control with sound effect volume control

PGF10:

- Available with optional graphite effect frame (shown)
- Viewing aperture: H240 x W690mm
- Dimensions: H445 x W736 x D320mm

PGF20:

- Viewing aperture: H240 x W1310mm
- Dimensions: H445 x W1356 x D320mm

NOTE: These fires do not include a heater

Surrounds

Round off your fire in style

Fully assembled MDF surround, back panel and hearth, purpose designed for use with Dimplex electric fires

No structural alterations needed as surrounds are freestanding – all you need is a flat wall and a power point for the fire

For use with electric fires only

Holwell

- Surround finished in maple effect with textured black back panel and hearth
- Compatible with all of the current Dimplex 16"/18" inset fires
- Model no. GDS1A

Rockbourne

- Natural stone effect surround
- Compatible with all of the current Dimplex 16"/18" inset fires
- Model no. GDS3

Ashmore

- Surround finished in mahogany effect with textured cream back panel and hearth
- Compatible with all of the current Dimplex 16"/18" inset fires
- Model no. GDS1

Lymington

- A free-standing fire with unique Optiflame® coal effect
- 2kW radiant heat, plus 0.5kW convected heat
- Flame effect can be used independently of heat source
- 'Economiser' control
- Finished in matt black with brass effect trim
- Model no. LYM28E

Theme

- Attractive cherry finish surround
- Flickering flame coal effect
- 2kW of radiant heat with 'Economiser' control
- Effect can be used independently of heat source
- 0.8kW convector with variable thermostat for background warmth

Product dimensions please see pages 64-66
Plinths/hearths not supplied

Yeominster

- Traditional freestanding fire
- Flickering log effect
- 2kW radiant heat with 1kW/2kW heat selection
- Effect can be used independently of heat source
- Model no. YEO20

Optima

- Freestanding or wall-mounted
- Attractive cherry finish surround
- 2kW of radiant heat with 'Economiser' control
- Effect can be used independently of heat source
- Flickering flame coal effect
- Choice of heat settings
- Model no. 314CHE

Lyndhurst

- Stylish black canopy
- Flickering flame log effect
- 2kW of radiant heat with 'Economiser' control
- Effect can be used independently of heat source
- 0.5kW of thermostatically controlled convected heat
- Choice of heat settings
- Model no. 430RCE/B

The solid fuel stove collection

Multi-fuel stoves from a name you can trust.

Multi-fuel stoves provide an unrivalled combination of characteristics; as well as being highly efficient heating appliances they also offer the mesmerising appearance of real flames and use, when burning wood, a sustainable, carbon-neutral source of fuel.

There are significant environmental benefits to using wood as a fuel for heating - wood is considered carbon-neutral because burning logs release into the atmosphere only the carbon that the tree absorbed through photosynthesis while it was growing. Wood is a renewable resource and is often available locally, reducing the need for transportation.

The quality and type of wood burnt greatly affects the performance of a stove; the lower the moisture content of the wood, the higher the potential heat output and the lower the emissions and amount of soot produced. Wood fuel should be untreated hardwood logs that have been cut, split and seasoned for at least twelve months (left to dry somewhere undercover but with free air circulation) or kiln-dried so that the moisture content is less than 20%. Some of the best species of timber for burning are ash and beech. Softwood species, particularly pine and fir, make poor firewood and due to their high resin content quickly create tar-like deposits in the chimney, necessitating frequent sweeping.

The Dimplex range of stoves includes five models that are Defra-exempted for wood-burning in UK Smoke Control Areas. An exempt appliance can be used to burn wood in designated Smoke Control Areas in which wood-burning would otherwise be illegal. Locations of Smoke Control Areas can be found on www.uksmokecontrolareas.co.uk

Many of the stoves in the Dimplex range are multi-fuel appliances which means that in addition to burning wood, they can also burn most manufactured smokeless fuels to increase flexibility in fuel supply and in most models, provide increased heat output.

All stove installations should be carried out by suitably qualified individuals and comply with relevant Building Regulations. Dimplex strongly recommends using a HETAS-registered installer; you can find details of your local installers on www.hetas.co.uk or by phoning 0845 634 5626. Many of the fireplace retailers who stock Dimplex stoves have their own HETAS-qualified installation teams and they can advise you on flue requirements and product suitability before purchase.

*10 year warranty on all new Dimplex solid fuel stoves. Terms, conditions and exclusions apply.

See www.dimplex.co.uk/stoves for full details.

After Sales Service

If you require after sales service please visit www.dimplex.co.uk/support

CE Mark

Our products carry the CE mark complying with European safety standards and the European Standard for electro magnetic compatibility.

British Electrotechnical Approvals Board BEAB Approved
The mark of the British Electrotechnical Approvals Board signifies that the appliance bearing it has been produced to the stringent safety requirements for domestic electrical appliances as laid down in BSEN60335.

All Dimplex electric fires are approved by BEAB or awaiting approval at time of printing.

Specifications

Dimplex policy is one of continuous improvement; the Company therefore reserves the right to alter specifications without notice. Although every care has been taken in the reproduction of product finishes in this brochure, the colour photographs and the flame effects should be taken only as a guide. The information contained in this brochure is correct at the time of printing. You are advised to consult your dealer before purchasing. For a list of stockists please visit www.dimplex.co.uk/stockist

The Dimplex Range

Dimplex offers the widest range of electric space and water heating products in the world – nearly 700 – to meet almost any heating need. In addition to this publication, we have a wide range of brochures for both domestic and commercial applications. Please visit our website for more information.

Dimplex Website

Our website is full of information which may be useful to you including:

- Details of your local stockists – including where you can see a particular fire on display
- Videos of the Opti-myst and Optiflame effects
- Installation and operating instructions
- How to buy spare parts
- Information on our range of solid fuel fires
